Applicant Information

Organization Name San Benito County Water District *

Tax ID 770139056

Proposal Name Pajaro River Watershed Integrated Regional Water Management Plan Update *

Proposal Objective The objective of our proposal is to update the existing Pajaro River Watershed Integrated Regional Water Management Plan to meet new Standards—such as climate change--while improving upon existing plan sections. Several key planning studies included in the proposal will bridge information gaps identified in the plan and address region priorities. A specific task for Disadvantaged Communities will allow for greater inclusion during the Plan update and project development. *

Is this an application for a Regional Planning Grant or an Interregional Planning Grant?

- a) Regional Planning Grant
- b) Interregional Planning Grant

Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

The Pajaro River Watershed Integrated Regional Water Management Proposition 84 Planning Grant Application proposal will update the existing Plan to meet new standards and incorporate current information, perform key planning studies to bridge information gaps identified in the existing plan and address regional priorities, and support greater inclusion of Disadvantaged Communities in IRWM planning and project development. The Regional Water Management Group needs to update the Plan to meet the current standards for governance, region description, resource management strategies considered, project review process, plan performance and monitoring, data management, finance, relation to local land use planning, stakeholder involvement, and climate change. Other sections of the IRWM Plan will be updated to include current information and reflect changes in the project list.

The proposal also includes key planning studies that will bridge data gaps, resolve conflicts, and/or facilitate projects to achieve the IRWM Plan objectives. These studies are: -Watershed Study to Address Key Data Gaps, which will also contribute to resolving conflicts surrounding integrated flood management. -Salt and Nutrient Management Planning, which addresses region and Regional Board priorities, facilitates recycled water use expansion consistent with region objectives, and will improve understanding of region conditions. -Implement Local Watershed Planning Process- College Lake Improvement and Watershed Management, which will develop strategies to maximize benefits for water supply and flood management while preserving steelhead habitat. The proposal also has a specific task for expanding DAC and Native American tribal community engagement in IRWM planning and implementation. Stakeholder outreach and engagement is an ongoing effort that will continue through the IRWM plan update process. All of the proposal tasks will be completed and integrated into the Plan by December 2012, when the new Plan will be scheduled for adoption.
